

Important information on reported counterfeit

It has come to our attention that products falsely claiming to be Targocid® (Teicoplanin) are being distributed in some states of India. Our investigations and laboratory analysis have further confirmed that these are **counterfeits** and are **not** manufactured or distributed by Sanofi.

We have promptly informed the health authorities and hospitals who are our customers, and duly have filed police complaint(s) for further investigations. We are taking all the necessary steps to extend our full support to the investigating authorities.

We cannot emphasize enough how important every patient is to us, and that their safety is at the core of all we do. Sanofi has clear policies and processes to protect the quality, safety and efficacy of all our products.

We urge you to exercise caution and buy products from authorized channels only; and be sure to check its packaging and expiry date before purchase.
